Rockville Centre, NY 11570

I. Executive Summary

Rockville Centre UFSD has developed their 2020 Lead in Drinking Water Sampling and Analysis Program, as required by the New York State Department of Health (Public Health Law Sections 1370-a and 1110, Subpart 67-4 Lead Testing in School Drinking Water).

In accordance with the regulation, this Lead Remediation Plan is prepared to identify locations deemed as Applicable Drinking Water Sources and report first draw sample results, to mitigate locations where sample results exceed 15 parts per billion, to identify locations deemed as Non-Applicable Water Sources, communicate this designation to building occupants, and to develop strategies for monitoring locations deemed Non-Applicable Water Sources to insure building occupants do not consume water from these locations.

The following locations within the Rockville Centre UFSD buildings have been deemed Applicable Drinking Water Sources by the administration:

- 1) Water fountains and bottle filling stations;
- 2) Kitchen water faucets and pot fillers used in food preparation;
- 3) Ice machines
- 4) Classroom sinks
- 5) Bathroom sinks
- 6) Nurse's Office Sinks
- 7) Faculty Room sinks

First draw samples were collected from each of these locations within the District, and analyzed by a New York State Department of Health ELAP certified laboratory. The chains of custody are available upon request. For results at or below 15 ppb, no further action is required until 2025. For locations above 15 ppb, options include: second and third draw sample collection to determine source of lead, designation of the location as Non-applicable Water Source, or permanent removal of the fixture from the location. In either case, the result was communicated by Enviroscience Consultants, and the fixture was shut off by the District immediately upon receipt of results.

The following locations within the Rockville Centre UFSD buildings were deemed Non-Applicable Water Sources by the administration:

- 1) Science Laboratory Sinks
- 2) Outside Spigots
- 3) Custodial Closet Sinks

In these cases, the Rockville Centre staff have placed signs adjacent to the fixture to notify occupants that the water is not intended for consumption. To further support this protocol, the following management of the locations is required:

- 1) Science Laboratory sinks - communicate in writing with students that these locations are for science experiments and hand washing only, not for consumption. This is most easily accomplished by including this language in the laboratory safety paperwork distributed to students at the beginning of the school year. This program should be monitored by the respective science teachers, and any deficiencies reported for assessment and revision, if necessary, by the Facilities Department.
- 2) Outside spigots - all-weather signage will be installed at each location. Further, spigots will have a special key maintained by the custodial staff to ensure that non-authorized persons do not fill sports coolers or use hoses for consumption. This program should be monitored by custodial staff to ensure consumption is not taking place, and any deficiencies reported for assessment and revision, if necessary, by the Facilities Department.
- 3) Custodial Closet sinks - these locations should be accessed by custodial personnel only, and locked when not in use. Access to others should be restricted. This program should be monitored by custodial staff to ensure consumption is not taking place, and any deficiencies reported for assessment and revision, if necessary, by the Facilities Department.

II. Sampling Methodology

In accordance with the regulation, EnviroScience Consultants, Inc. performed initial water sampling throughout the Rockville Centre UFSD buildings from March 26 to April 1 and on September 25, 2020. Samples were collected in wide-mouth 250 milliliter containers and were collected in the morning hours before the facilities opened. The water sources were not used for at least 8 hours and not more than 18 hours prior to sampling. Unique source numbers and designations were assigned to each source location. Unique sample identification numbers were assigned to each sample taken. The key to fixture type codes and the sampling location schematics are shown below.

Fixture Type Codes

BF Bottle Filler
HB Hose Bib
IM Ice Machine
OS Other Source
PF Pot Filler
SK Sink
SL Supply Line
SP Spigot
SPY Spray
SS Slop Sink
V Valve
WC Water Cooler
WF Water Fountain

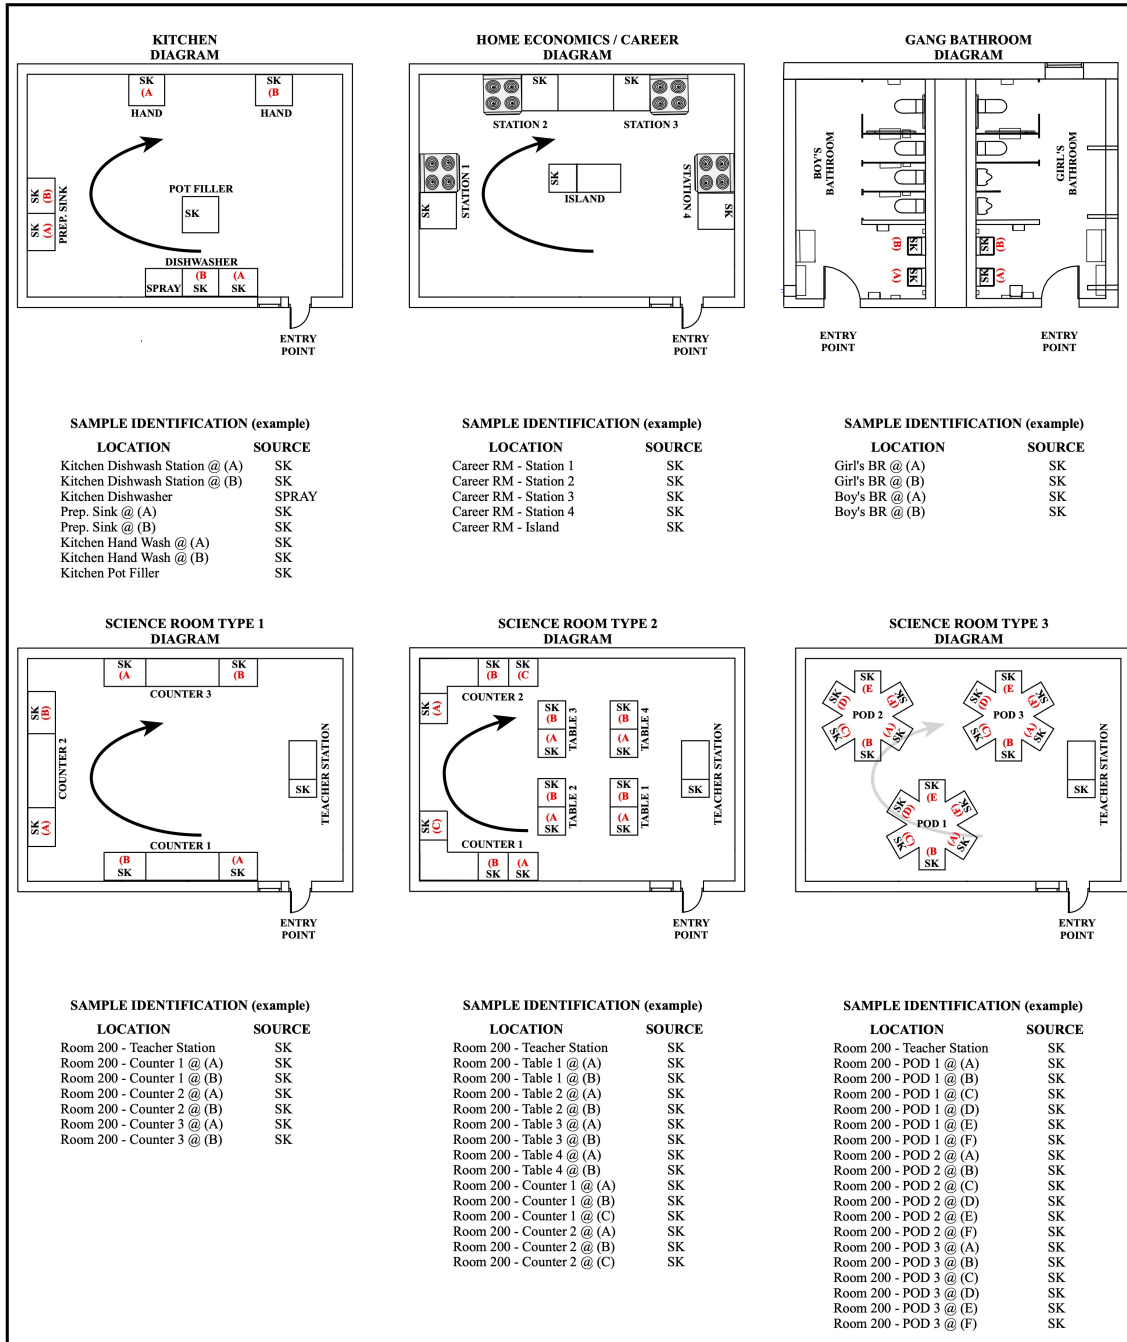

Source Designations

App Applicable
N/A Non-applicable

Remediation Type Codes

FR Fixture Replacement
FRSLV Fixture, supply line or valve replacement
FRSLVPA Fixture, supply line or valve replacement
plumbing assessment
SIGN Non-potable water sign posted
CAPPED Supply line capped or fixture removed

Sampling Location Schematics

III. Initial Results:

All water source locations in each of the school buildings were assessed. Water source locations identified as drinking water sources were considered Applicable, and first draw samples were collected. Water source locations identified as non-drinking water sources were considered Non-applicable and these locations were documented.

The results of the initial sampling and the use of signs warning against water use at Non-applicable sources is documented in the School Water Outlet Inventory for each building (Appendix A through G).

All elevated locations should be taken off line until the remediation is completed. Any other drinking water sources in these buildings that were not functional at the time of initial sampling and have not been tested should be tested. All locations deemed non-applicable, but do not have signs, should be taken off line until signs have been posted.

The following is a summary of results in parts per billion (ppb) of locations where sample results were found above 15 ppb:

Laboratory Report

NYE Report #: 2201447-14349

April 3, 2020

Enviroscience Consultants, Inc.
2150 Smithtown Avenue
Ronkonkoma, NY 11779

Project: Floyd B Watson, Rockville Centre, NY

Dear Project Manager,

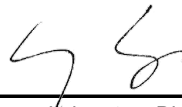

Enclosed is the Laboratory Analytical Report for potable water sample(s) received on March 31, 2020. New York Environmental analyzed the samples on April 02, 2020 for Lead (Pb) by EPA Method 200.9 Rev. 2.2.

If there are any questions regarding the analyses, please feel free to contact us at your convenience. New York Environmental is a NELAP accredited laboratory. Attached reported results meet the requirements of the NELAP standards unless otherwise noted.

Samples' analytical results relate only to the samples tested, in the condition received by the laboratory. This report shall not be reproduced except in its entirety without written approval of the laboratory.

We sincerely thank you for your business, and look forward to being of service for your future environmental testing needs.

Sincerely,

Li Tsang, Laboratory Director

Laboratory Report

NYE Report #: 2201450-14352

April 3, 2020

Enviroscience Consultants, Inc.
2150 Smithtown Avenue
Ronkonkoma, NY 11779

Project: Francis F Wilson Elementary, Rockville Centre, NY

Dear Project Manager,

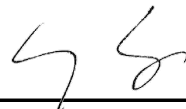

Enclosed is the Laboratory Analytical Report for potable water sample(s) received on April 01, 2020. New York Environmental analyzed the samples on April 02, 2020 for Lead (Pb) by EPA Method 200.9 Rev. 2.2.

If there are any questions regarding the analyses, please feel free to contact us at your convenience. New York Environmental is a NELAP accredited laboratory. Attached reported results meet the requirements of the NELAP standards unless otherwise noted.

Samples' analytical results relate only to the samples tested, in the condition received by the laboratory. This report shall not be reproduced except in its entirety without written approval of the laboratory.

We sincerely thank you for your business, and look forward to being of service for your future environmental testing needs.

Sincerely,

Li Tsang, Laboratory Director

Laboratory Report

NYE Report #: 2203830-15684

September 29, 2020

Project Manager
Enviroscience Consultants, Inc.
2150 Smithtown Avenue
Ronkonkoma, NY 11779

Project: Jennie E. Hewitt Elementary School, Rockville Center, NY

Dear Project Manager,

Enclosed is the Laboratory Analytical Report for potable water sample(s) received on September 25, 2020. New York Environmental analyzed the samples on September 26, 2020 for Lead (Pb) by EPA Method 200.9 Rev. 2.2.

If there are any questions regarding the analyses, please feel free to contact us at your convenience. New York Environmental is a NELAP accredited laboratory. Attached reported results meet the requirements of the NELAP standards unless otherwise noted.

Samples' analytical results relate only to the samples tested, in the condition received by the laboratory. This report shall not be reproduced except in its entirety without written approval of the laboratory.

We sincerely thank you for your business, and look forward to being of service for your future environmental testing needs.

Sincerely,

Li Tsang, Laboratory Director

Laboratory Report

NYE Report #: 2201452-14354

April 3, 2020

Enviroscience Consultants, Inc.
2150 Smithtown Avenue
Ronkonkoma, NY 11779

Project: William S Covert Elementary, Rockville Centre, NY

Dear Project Manager,

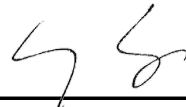

Enclosed is the Laboratory Analytical Report for potable water sample(s) received on April 01, 2020. New York Environmental analyzed the samples on April 02, 2020 for Lead (Pb) by EPA Method 200.9 Rev. 2.2.

If there are any questions regarding the analyses, please feel free to contact us at your convenience. New York Environmental is a NELAP accredited laboratory. Attached reported results meet the requirements of the NELAP standards unless otherwise noted.

Samples' analytical results relate only to the samples tested, in the condition received by the laboratory. This report shall not be reproduced except in its entirety without written approval of the laboratory.

We sincerely thank you for your business, and look forward to being of service for your future environmental testing needs.

Sincerely,

Li Tsang, Laboratory Director

Laboratory Report

NYE Report #: 2201416-14322

March 31, 2020

Enviroscience Consultants, Inc.
2150 Smithtown Avenue
Ronkonkoma, NY 11779

Project: South Side Middle School, Rockville Centre, NY

Dear Project Manager,

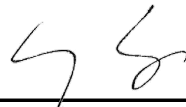

Enclosed is the Laboratory Analytical Report for potable water sample(s) received on March 27, 2020. New York Environmental analyzed the samples on March 28, 2020 for Lead (Pb) by EPA Method 200.9 Rev. 2.2.

If there are any questions regarding the analyses, please feel free to contact us at your convenience. New York Environmental is a NELAP accredited laboratory. Attached reported results meet the requirements of the NELAP standards unless otherwise noted.

Samples' analytical results relate only to the samples tested, in the condition received by the laboratory. This report shall not be reproduced except in its entirety without written approval of the laboratory.

We sincerely thank you for your business, and look forward to being of service for your future environmental testing needs.

Sincerely,

Li Tsang, Laboratory Director

Laboratory Report

NYE Report #: 2201412-14318

March 31, 2020

Enviroscience Consultants, Inc.
2150 Smithtown Avenue
Ronkonkoma, NY 11779

Project: Rockville UFSD; South Side High School

Dear Project Manager,

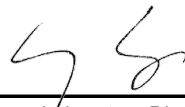

Enclosed is the Laboratory Analytical Report for potable water sample(s) received on March 28, 2020. New York Environmental analyzed the samples on March 27, 2020 for Lead (Pb) by EPA Method 200.9 Rev. 2.2.

If there are any questions regarding the analyses, please feel free to contact us at your convenience. New York Environmental is a NELAP accredited laboratory. Attached reported results meet the requirements of the NELAP standards unless otherwise noted.

Samples' analytical results relate only to the samples tested, in the condition received by the laboratory. This report shall not be reproduced except in its entirety without written approval of the laboratory.

We sincerely thank you for your business, and look forward to being of service for your future environmental testing needs.

Sincerely,

Li Tsang, Laboratory Director
